

PRX ENERGY

Energy Strategies and Portfolio Management

PRX Energy focuses on the purchase, use and management of energy portfolios for education and other institutional organizations in deregulated energy markets.

Our approach empowers customers to :

- *Deliver substantial cost savings*
- *Mitigate budget exposure to market volatility*
- *Achieve financial and sustainability goals*

Leverage proven tools, analytics and best practices to develop energy strategies and execute transactions that are simple to manage and highly effective.

Procurex

"PRX Energy works with Procurex to maximize competition in the energy markets and lower costs to our customers through the use of aggregations, market timing and optimal contract terms."

Bret Grady, CEO of Procurex

Let us help you integrate your energy portfolio...

- Energy Training

PRX Energy is founded and managed by **seasoned energy professionals** and has a network of top companies including renewable energy developers and energy suppliers. With **over 23 years experience in the energy markets** working

as a senior executive in the Siemens energy management business, PRX leadership has experience with every stage of the energy supply chain: supply, transmission, distribution, and consumption.

From Fortune 100 companies and large public institutions to independent colleges and local municipalities, **PRX Energy understands energy markets and the needs of energy users** and can work with you to manage energy costs, reduce budget uncertainty and achieve your sustainability goals.

PRX Energy focuses on the total energy spend identifying opportunities to reduce energy costs and convert to more renewable sources.

We bring all the pieces together into one coherent strategy that delivers measureable success over the long-term.

Build an energy portfolio that achieves financial and sustainability goals without compromise...

American University

American University is aggressively pursuing its sustainability agenda and is creatively looking for opportunities to reduce the impact of its energy usage on the environment. PRX Energy is helping AU to think through the economic impacts of its sustainability initiatives to ensure that it can also remain cost competitive over the long term. PRX Energy has saved AU over \$100,000 annually by providing market analysis and supporting contract negotiations that ensure AU has the right plan for its entire energy portfolio including both renewable power and deregulated purchase.

Ivy Tech Community College

Ivy Tech Community College is a state owned community college system across the state of Indiana. ITCC is constantly looking for ways to reduce cost in the face of ever-tightening state budgets. PRX Energy worked with ITCC and several local independent colleges to build a natural gas aggregation. The aggregation enhances market leverage for all participants and was able to achieve over \$400,000 in savings against tariff alternative and about a 14% reduction in supplier premiums.
