

Energy markets, regulations and providers vary across state lines and even across utility companies within each state. Working together with like-minded peers that share common interests and opportunities is a valuable and efficient way to manage the costs and risks inherent in your energy budget. PRX Energy's Local Energy HUBs maximize the impact of local cooperation far better than large broad-based aggregations. Local Energy HUBs bring local businesses and institutions together to tackle common issues, increase leverage in competitive markets and capitalize on direct local opportunities.

*Work together with local-area businesses and institutions to reduce energy costs and meet important conservation and renewable goals...*

### PRX Energy Provides the Leadership and Resources to Succeed:

- ⇒ Over 25 years of energy experience with competitive transactions, market monitoring, regulated rates, renewable energy and energy conservation.
- ⇒ Development of local energy HUBs in the Midwest and Northeast markets.
- ⇒ Creative, proactive and personalized engagement with HUB participants
- ⇒ Updates on local energy market conditions and opportunities
- ⇒ Identification and management of shared energy saving transactions.
